Based on the available information, the property located south of MD 144 near Bartonsville, on a parcel of land to be developed as Winding Ridge, does not meet the National Register criteria for inclusion in the National Register of Historic Places. The farmstead, which consists of a frame house, several frame barns and sheds, and a stone springhouse, does not possess sufficient integrity to be eligible under criteria A or C as a representative example of a modest 19th century farmstead of Frederick County. The house may date to the turn of the century or earlier, but has been so extensively altered that there is no historic character left and no means of estimating a construction date. The frame barns and sheds appear to be 20th century. The stone springhouse appears to date to the mid- to late-19th century and is nice example with two stories, double hung windows in the second story and decorative barge boards. However, it is in a deteriorated condition and does not possess sufficient significance to warrant individual listing. The property is not known to have been associated with a significant person, and thus is unlikely to be eligible under criterion B. It is not located in any known historic district.
